Subject: RE: TRW Microwave Site, 825 Stewart Dr: Follow-up on the Aug 19 2021 Site Visit

Hi Michael,

Per our discussion last week, Northrop Grumman and AECOM are committed to address EPA's comments, as laid out in our response letter dated November 5, 2021. We have requested as-built drawings of the HVAC system installed at the former Microwave Site building from Apple, ensuring that we have accurate dimensions and heights of all portions of the SSD and HVAC systems, which is necessary to complete the SSD assessment. The facility manager for Apple is currently searching for this information and will give us a response in the next few days. Should the as-built drawings not be available, and therefore an additional Site visit be required, the completion of the SSD assessment may be delayed beyond the March 15 date. I will reach out to you when we get more clarity on timing.

The SSD O&M Plan will be submitted to EPA by March 31.

Feel free to give me a call or email at any time if you have additional questions.

Thanks,
Josh

Subject: EXT :RE: TRW Microwave Site, 825 Stewart Dr: Follow-up on the Aug 19 2021 Site Visit

Hi Josh,

It has been a couple months since your last update and half-a-year since we conducted the site visit to 825 Stewart Ave. Please provide an update on whether NGC's preliminary review of the SSD system is complete and whether an additional site visit was required.

In line with NGC's schedule below, **please submit by March 15, 2022, a complete response to EPA's October 7, 2021, comments.** Include in NGC's response any proposed modifications to the SSD system vent stacks to address potential emissions from being pulled into the building's HVAC. Also include in NGC's response a schedule to implement the proposed SSD system modifications.

Additionally, by **March 31, 2022, please respond** to EPA's October 7, 2021, request to submit a plan that documents the scope of the SSD system's long-term operations and maintenance and a figure showing where the existing sub-slab sampling ports are located. We expect that GI DC Sunnyvale, LLC will cooperate with NGC's efforts consistent with EPA's 2014 prospective purchaser letter (attached).

Thank you in advance for your cooperation to address EPA's comments. If NGC is unable or does not intend to meet this schedule, please contact me immediately so that we can discuss the issue and EPA can evaluate other alternatives for completing this necessary work in a timely manner.

Thank you,

Michael Schulman

Subject: RE: TRW Microwave Site, 825 Stewart Dr: Follow-up on the Aug 19 2021 Site Visit

Hi Michael,

We'll conduct a preliminary review of the SSD system in the upcoming weeks based on the photos taken during the recent Site visit. If an additional Site visit is needed, we plan on coordinating an inspection in January 2022 and have a draft evaluation of the SSD system ready, as well as the system O&M work plan, by mid-March 2022.

Please let me know if you have any questions.

Thank you,
Josh

Schulman, Michael has shared a OneDrive for Business file with you. To view it, click the link below.

 [2021-11-05_TRW Microwave_USEPA Letter RTCs_Final.pdf](#)

Hi Josh,

I'm following up on below and our call last week. Can you give me an update by **this Wednesday** on EPA's comments and RTCs attached? I particularly need to know the specifics for what changes to the roof vents for the SSD system that NGC is recommending for EPA review and what plans NGC has to formalize the SSD system maintenance and inspections.

Feel free to call me if there is anything you want to go over. Thank you,
Michael

Hi Kurt and Josh,

Please find attached in a letter EPA's follow up comments on the August 19, 2021 site visit of the 825 Stewart Drive building. EPA requests that NGC provide a written response to EPA's comments in the next 30-days. Please feel free to contact me anytime if you have any questions or there is anything you want to go over.

Thank you,

Michael

Hi Kurt, thanks. we'll start at 08:00 then. I'll get to the site around 07:30 to 07:45. I have a briefing I need to give from 1-2 pm, so we'll either be done by then or Matt will fill in for me.

Regarding the NDA the EPA site attorney spoke to an Apple attorney and EPA is not going to sign the Apple NDA. Apple will send a letter to EPA saying that everything we create during the Site Walk (e.g., field notes, photos) is being claimed by Apple as CBI and we will treat it as such under our CBI regulations at 40 CFR Part 2. After the visit, we will send Apple back everything we created so they can then substantiate their claim. We will want to work with the Apple representative while onsite to minimize any creation of CBI. So, for example, if it's possible to take a photo at an angle that wouldn't be claimed as CBI that is probably what we'd want to do. Let me know if you have any questions.

Thank you,
Michael

Hi, Michael – We will have the following people attend:

- Michael Shannon – Northrop Grumman's Corporate Manager, Environmental Remediation.
- Holly Holbrook – AECOM's Project Manager
- Myself – Northrop Grumman's Project Manager

I am expecting we will also have an escort from Apple but I have not yet been able to confirm who that will be. I'll let you know as soon as I hear back from Apple.

Hi Kurt,

Myself and Matt Plate will be able to visit the site on Thursday 8/19. The only caveat is that we both need final approvals for field work considering the current high COVID-19 transmission rates; however, this should not be an issue.

Thank you,
Michael

Hi, Michael – We are available on Thursday 8/19. I am still waiting for confirmation from GI Partners and Apple, but I would not expect there to be any issues with them. I will give you final confirmation on it by the end of the week, but I wanted to go ahead and let you know that 8/19 is looking the best for us. We will plan to arrive the evening before so could start as early as you would like in the AM.

Subject: Site visit: TRW Microwave Site 825 Stewart Drive building

Hi Kurt,

EPA requests a site walk and inspection visit of the TRW Microwave Site 825 Stewart Drive building. Can you arrange for EPA access to the building from the current property owner, which I believe is GI DC Sunnyvale LLC? Myself and Matt Plate with EPA request reasonable access to visit the items addressed in the attached annual inspection memo and the 2014-2015 building mitigation measures that addressed the potential for vapor intrusion into the building, which included:

- The sub-slab depressurization system that was installed underneath the site building to vent vapors to the atmosphere.
- The building's concrete slab and cracks that were sealed to prevent vapor intrusion. As well as any building concrete slab penetrations (e.g., from pipes or seams in the building).
- Past indoor air sampling locations.
- The location where contaminated soil was excavated from underneath the building.
- The spaces between the walls of the three sections of the buildings that were sealed in 2014-2015.
- The emulsified vegetable oil in-situ bioremediation system.
- The location of groundwater monitoring wells.

EPA also wants to review any post 2014-2015 building modifications or changes to the building.

Can you get back to me this week with some dates for a site visit in August? Northrup Grumman and your consultant are also invited to attend, understanding that there may be COVID-19 related restrictions in how many people can visit the building or congregate. I am available for a site visit any week, except for August 9-11 and the week of August 23-27 and Matt Plate typically has limited availability on Fridays.

Feel free to call me to go over,
Thank you,

Michael Schulman
